Disney Releases New 'Frozen 2' Trailer

Fans get a bigger glimpse at Elsa and Anna's difficult and dangerous journey in the new trailer for Walt Disney Animation Studios' 'Frozen 2', which opens in theatres November 22. Disney has revealed a tad more of the secretive storyline. Why was Elsa born with magical powers? The answer is calling her and threatening her kingdom. Together with Anna, Kristoff, Olaf and Sven, she'll set out on a dangerous but remarkable journey far beyond the gates of Arendelle. In 'Frozen', Elsa feared her powers were too much for the world. In 'Frozen 2', she must hope they are enough.

Pixar's 'Toy Story 4' proves once again it's always about character

What's always made Pixar's Toy Story films so special, their true superpower, has been their characters. And their characters' character. Sometimes funny. Sometimes sad. But always uniquely and poignantly human. Audiences have been introduced to some of animation's most endearing, entertaining and memorable characters - most notably Woody and Buzz Lightyear - courtesy of this venerable film franchise that, back in 1995, launched an industry with the world's first CG animated feature film.

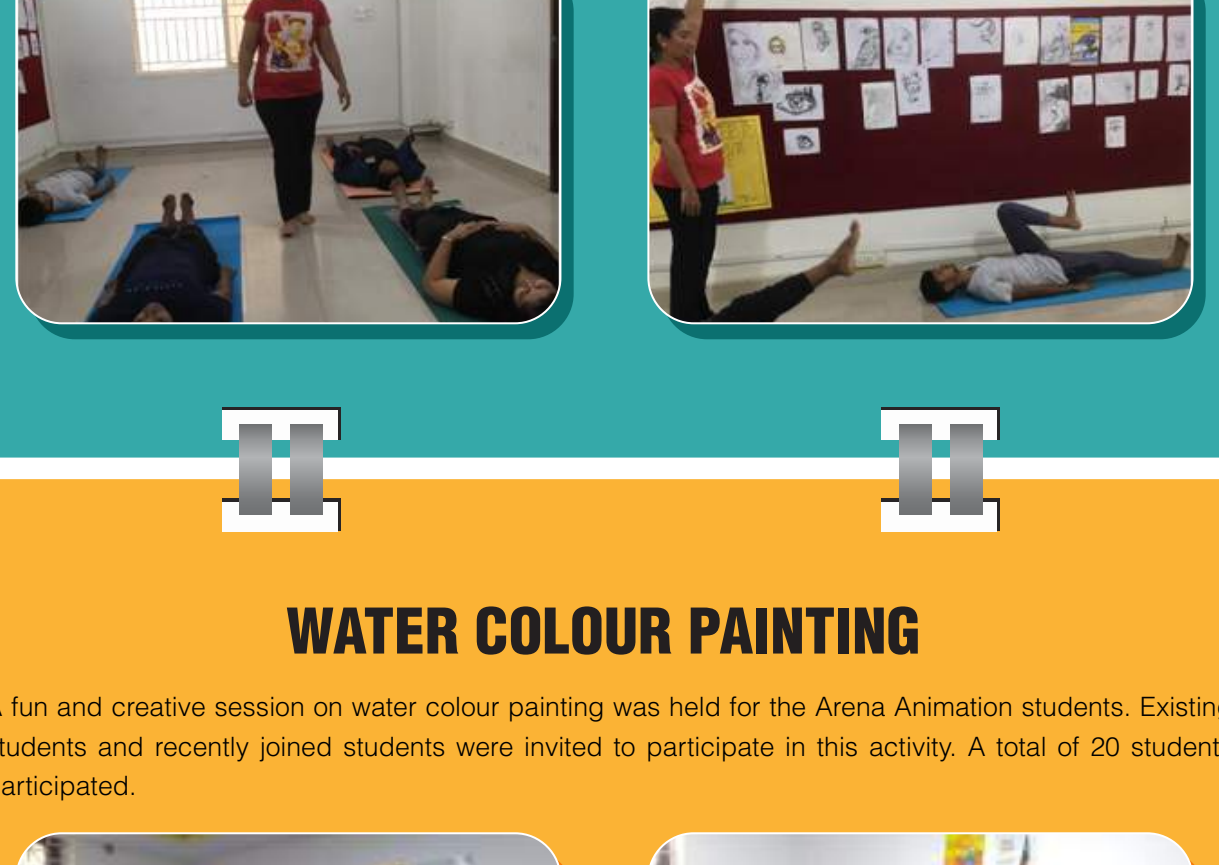

In fact, Pixar is at its very best when delivering what seems like a never-ending stream of richly developed and expertly crafted characters that audiences instantly relate to and connect with emotionally. We see a little bit of ourselves in Pixar film characters, even though, in the case of the studio's latest film, 'Toy Story 4', for the fourth time, they're... well... toys. Once again, the studio has produced an animated gem that lets us view the world from a toy's perspective.

The movie released in theaters on June 21, 2019.
